

## FAQ – Frequently asked questions

1. Who set the new trading relationship, respectively the new Mailboxes?  
*The supplier have to set the new Mailboxes.*
2. Are there any changes for the VDA messages like VDA 4905 and VDA 4913?  
*No changes of the structure of the message.*  
*The only change is the Sender/Receiver → [Next plants to move to SPIRIT](#)*
3. Is there a change for delfor\_04a, desadv\_07a, invoice\_07a?  
*If you have already implemented the global formats there are no structural changes for you.*
4. What are the changes for the WEB EDI Supplier?  
*No change concerning the process. Only change of master data (see point 6)*
5. Is there any change of the EDI communications channel?  
*No changes.*  
*EDI Addresses (OFTP2, AS2) and VFN (virtual file name) remain the same.*
6. What are the new contents of the following fields?  
NAD+BY (customer number by the supplier)  
NAD+ST (ship to address)  
NAD+WH (warehouse address)  
NAD+GM (receiver/ controller of the inventory)  
*You will be informed about the changes regarding the content of the EDI messages from the experts in each Continental Plant.*
7. What happens if we are not able to change to the global SPIRIT format?  
*The suppliers have the choice to switch to the WEBEDI, respectively to our SupplyOn (for one or for all messages). Please inform the plant.*

If you still have questions regarding the structure of the Continental global message format please write us an **Email** at:
